Hype

The Swasey brothers, Joe, Sid, Charley, and Rod, were some of the early cattlemen that explored the San Rafael Swell while running cattle there in the late 1800s and early 1900s. You find their names on many features in the Swell such as Sid and Charley Tower, Joe and His Dog, Sid's Leap, etc. The stories and places they have roamed have given them a larger than life persona in my mind. It is hard to imagine wandering the Swell when it was so remote and little known.

In 1921, Joe Swasey built what is known as Swasey's Cabin in the heart of the Swell. The cabin was to be used as shelter by the Swasey's and other cowboys when running cattle in the area. Almost 100 years later, the cabin still stands in its picturesque spot near Broken Cross Tower. It is a fascinating historical place to visit.

Route

From the parking area and pit toilet, the cabin is visible a short distance down the trail. Behind the cabin is Broken Cross Tower.

No visit to Swasey's Cabin is complete, in my opinion, without visiting the Ice Box, especially if it is a hot day. From the cabin, head west on the well defined trail. It passed Broken Cross Tower, then intersects the jeep road that goes into Eagle Canyon. Go left on the jeep road about 2 minutes (0.1 miles) to a log fence trailhead signed the Icebox Trail. Take the Icebox trail a short distance to the cliff face and the Icebox. It is a unique and interesting place.
